

**Haines Borough Wood Heat Feasibility Study**  
**Addendum #1**

Under Scope of Work:

Section 3, Paragraph 3 (page 2) is amended to read:

The report will include a detailed description for the biomass boiler system and fuel feeding/storage system recommended by the successful proposer for this environment and specific installation **which shall include:**

- **Equipment specifications**
- **Conceptual design drawings of the proposed heating system as installed**

Section 3, Paragraph 4 (page 2) is amended to read:

The report will include a cost breakdown for the unit(s), feeding system, transport, installation and training of maintenance personnel, and any other costs. It will also include weight and dimensions of the unit(s).

**It is expected that 20% to 25% of the bid will be used for conceptual design, please outline how much money will be spent on conceptual design verses the feasibility study.**

Note: Added language is in **boldface**.
